PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science student with hands-on experience in Python, SQL, data analytics, machine learning, AI prompting. Developed real-world projects involving FastAPI, MongoDB, APIs, GPS tracking, and AI-based applications, with a strong interest in Data Science and AI Engineering.

EDUCATION

Bachelor of Engineering in Artificial Intelligence and Data Science (B.E)
S.G.Balekundri Institute of Technology (SGBIT BELAGAVI) ,VTU
CGPA: 8.25

Sep 2023 – Jul 2027
Belagavi, Karnataka

TECHNICAL SKILLS

Languages : Python, SQL

Data Science : Pandas, NumPy, Scikit-learn, Data Cleaning, EDA, Data Preprocessing

Machine Learning : Scikit-learn, Supervised & Unsupervised Learning, Regression, Classification, Clustering, Model Evaluation

Statistics : Probability, Descriptive Statistics, Hypothesis Testing

Visualization : Matplotlib, Seaborn, Tableau, Power BI, Excel

Databases : MySQL, MongoDB

Backend & APIs : FastAPI

Developer Tools : Git, GitHub, Jupyter Notebook, VS Code, PyCharm

Soft Skills : Communication, Leadership, Problem Solving, Critical Thinking, Adaptability, Teamwork, Collaboration, Time Management

Language : English, Hindi, Kannada

PROJECTS

DeepGuard-AI Framework for Detecting Synthetic Images & Voices

Jan 2026 - Present

Python, FastAPI, React, Machine Learning, MFCC, FFT

- Developed an AI-powered framework to detect AI-generated images, videos, and synthetic voices, addressing the growing risk of deepfake content.
- Designed a full-stack architecture using React for the frontend and FastAPI for backend APIs, integrating machine-learning inference into the application.
- Explored machine learning-based image classification techniques and MFCC/FFT-based audio feature extraction for synthetic media detection.
- Implemented upload and processing workflows with confidence scores and detection explanations to improve result interpretability.

Public Transportation Information System - Belagavi City

Oct 2025 – Oct 2026

React.js, Python, FastAPI, MongoDB, REST APIs, GPS, Maps

- Developed a web-based platform to improve public transportation accessibility and information for passengers in Belagavi City.
- Designed functionality for bus route search, estimated arrival time (ETA), fare information, and bus capacity indicators.
- Integrated GPS and mapping services to visualize bus routes and stops on an interactive map.
- Developed an administrative dashboard for managing routes, buses, and transportation information.

BlinkIT Grocery Dashboard

Oct 2025 – Oct 2025

Tableau, Excel, Data Visualization

- Built an interactive Tableau dashboard to analyze grocery sales, outlet performance, product categories, and pricing.
- Analyzed sales trends, fat-content distribution, and average MRP across different item types.
- Created interactive bar charts, bubble charts, pie charts, and KPI visualizations for business insights.
- Used Excel for data preprocessing and calculated fields to prepare the retail dataset.
